

# MARY'S RIVER LUMBER CO.

## All Western Red Cedar

Mary's River manufactures a full range of Western Red Cedar products, including paneling, siding, decking, boards, and fencing. Fully integrated mills in Philomath and Corvallis, Oregon, and Montesano and Elma, Washington use sawmill systems, planer-moulders, and dry kilns designed specifically for processing Red Cedar for optimum quality and efficiency.

## All Natural

Western Red Cedar is not only naturally beautiful, but it has been shown in a recent life cycle study by a leading forest research laboratory to be the intelligent choice for green applications. Red Cedar outperformed fiber-cement, vinyl, wood-plastic composites, and bricks against the criteria of raw material acquisition; energy consumption; carbon footprint; air, water and soil emissions; and waste.

## All★American

Mary's River is in the center of the Western Red Cedar belt of the U.S. Pacific Northwest coastal region. Our American values of innovation, resourcefulness, investment and environmental responsibility have made Mary's River America's leading manufacturer of Western Red Cedar products.

Western Red Cedar's rich texture echos the style of this events venue in the foothills of Oregon's rugged Coast Range.
