

About Us

**Mary's River
Lumber Company**

Mary's River Lumber Co., America's leading producer of Western Red Cedar, manufactures a diverse line of cedar products, including paneling, siding, decking, boards, and fencing. Fully integrated mills in Philomath and Corvallis, Oregon, and Montesano, Washington use sawmill systems, planer-moulders, and dry kilns designed specifically for processing Red Cedar for optimum quality.

The warmth, beauty, and durability of solid-sawn Western Red Cedar makes an unmatched statement of quality and elegance for residential siding. Tight-knotted Western Red Cedar bevel siding is a cornerstone to the Mary's River product line. Our excellent grade, quality, manufacturing standards, and length assortment, have made Mary's River Bevel the preferred product for cedar siding by distributors nationwide and their customers.

The first step in producing Mary's River superior bevel siding is selecting logs that will yield bevel blanks of optimum quality. The STK blanks are then manufactured on custom-designed equipment to produce the grade, length assortment, and packaging requirements associated with the high quality standards at Mary's River.

Computerized dehumidification kilns at Mary's River enable us to produce a premium KD Bevel for markets requiring dry bevel siding.

Unlike synthetic substitutes that attempt to simulate the appearance of cedar siding, Mary's River authentic Western Red Cedar Bevel has the natural depth and character desired for the finest appearance. Nothing else comes close to cedar's ideal combination of durability, stability, and workability to achieve natural beauty in finely crafted homes.

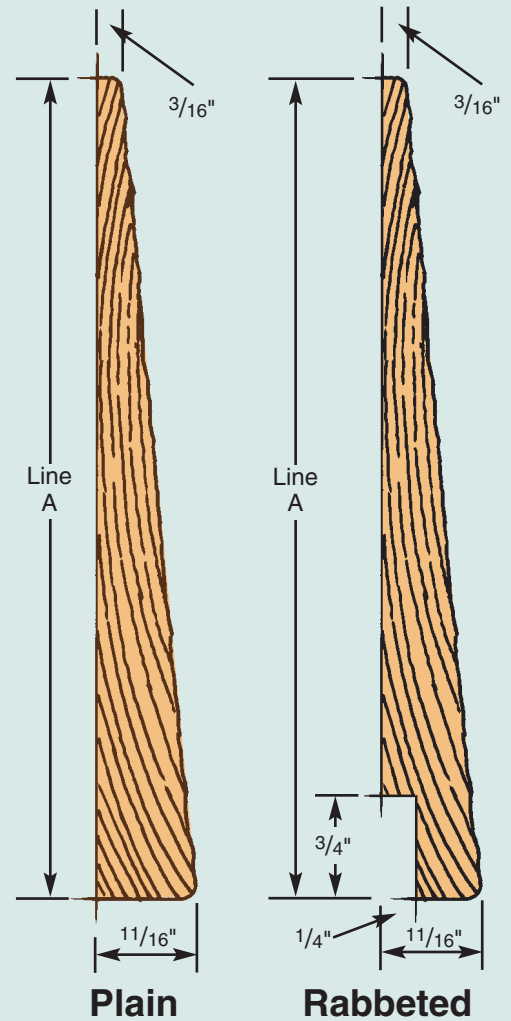

Mary's River Bevel siding finished with solid oil stain makes a statement of quality and elegance on America's finest homes.

A truck, loaded with Mary's River Western Red Cedar, is ready for delivery.
