

## About Us

**Mary's River  
Lumber Company**

Mary's River Lumber Co., America's leading producer of Western Red Cedar, manufactures a diverse line of cedar products, including paneling, siding, decking, boards, and fencing. Fully integrated mills in Philomath and Corvallis, Oregon, and Montesano, Washington use sawmill systems, planer-moulders, and dry kilns designed specifically for processing Red Cedar for optimum quality.

Quality conscious designers and builders specify Western Red Cedar boards for fascia, window, and corner trim, and no one manufactures Red Cedar boards better than Mary's River. Our Red Cedar is preferred for its rich textured appearance, resistance to decay and insects, and its unexcelled workability. Other species may simulate the look of cedar when painted, but Red Cedar is the ultimate species for long-life beauty.

Mary's River has pioneered the successful use of tight-knot, second-growth Red Cedar. Mary's River Boards are an excellent use of forest resources and an environmentally wise choice.

Our Red Cedar Boards are available unfinished or with a premium, oil-based primer that is ready for final finish at the job site. Most builders prefer the full coverage primer for its superior

coverage and convenience. It can be finish coated with any quality, exterior latex paint. Red Cedar Boards make a handsome statement in almost any architectural style, from today's craftsman to traditional or contemporary. There is a depth and detail that cannot be duplicated by wood substitutes.

Mary's River Red Cedar has superior workability and enables clean cutting and easy nailing with no splitting. Its excellent stability makes it ideal for today's details in window trim.

Mary's River has built its reputation on excellent sales support, delivering customers the Red Cedar they need, when they need it.

Mary's River Red Cedar Board is available in various widths and lengths to accommodate almost any fascia and trim requirement.

A truck load of Mary's River Western Red Cedar Boards are shipped from our Corvallis finishing plant.
