

A restored sawmill carriage from a bygone era is displayed at our Montesano office.

Committed to Quality, Innovation and Service From the Beginning

Don't let the historic carriage on display at Mary's River fool you—we are not a mill of the past. Mary's River Lumber Company is an industry leader in the development and implementation of cutting-edge sawmill and finishing systems specifically designed for processing Western Red Cedar.

Innovation such as this, has been the cornerstone of Mary's River success, and we have been building on this since our beginning decades ago. Our core values of top-quality manufacturing, innovative production, and excellent customer service have enabled us to become the nation's leading producer of Western Red Cedar building materials.

It is all about quality—the Mary's River standard for doing business. Our business

is exclusively milling Red Cedar into superior products; therefore, our mission is to constantly improve on the production for the best possible Western Red Cedar products available.

A quality wood product starts with the raw material and Mary's River starts with selected Red Cedar timber. Second growth, tight-knot logs are optimized to meet production criteria and efficiency.

The state-of-the-art milling equipment and specially designed kilns at our Corvallis and Montesano finishing plants produce Western Red Cedar at its best, enhancing the product's rich texture and fine detailing.

Mary's River staff is committed to unmatched customer service. Our sales support team is attentive and responsive to the needs of our customers, working with production to get specific tallies shipped for arrival when the customer needs it. You can depend on Mary's River to deliver the best Western Red Cedar available.
