

**Mary's River
Lumber Company**

About Us

Mary's River Lumber Co., America's leading producer of Western Red Cedar, manufactures a diverse line of cedar products, including paneling, siding, decking, boards, and fencing. Fully integrated mills in Philomath and Corvallis, Oregon, and Montesano, Washington use sawmill systems, planer-moulders, and dry kilns designed specifically for processing Red Cedar for optimum quality.

Mary's River Tongue & Groove, a premium, solid-sawn Western Red Cedar product, is ideal for siding or paneling.

The natural depth of wood grain in Red Cedar produces a siding of unmatched beauty for today's high-quality, traditional style homes. Each board is precision machined with a resawn, rough face and a smooth face, so the customer can choose a surface that is casual and rustic or more formal and elegant.

The smooth face with deep beveled edges creates a paneling of warmth and

richness that enhances any decor. Our Tongue & Groove is available in tight-knot or clear grades to fulfill your customer's requirements.

Using state-of-the-art milling equipment and specially designed kilns for optimum quality in our Corvallis and Montesano finishing plants, we are able to insure that every piece of our Tongue & Groove meets the rigid, Mary's River quality standards.

For ease of merchandising and handling, Tongue & Groove is bundled six pieces to a package with end caps. End caps are printed with installation tips. Our Tongue & Groove is kiln-dried to exact specifications for excellent installation.

Mary's River Tongue & Groove is backed by our commitment to the highest standards in product quality and customer service. You can depend on Mary's River, the Western Red Cedar industry leader through innovation and outstanding service.

Mary's River Tongue & Groove Paneling adds warmth, depth and richness to any room decor.

Mary's River Tongue & Groove is packaged in bundles with end-caps. The bundles are assembled in a unit ready for shipment.

Tongue & Groove
